Please join us for a Health Decision Science Seminar at

12:30 PM on Wednesday, October 29

CHDS Conference Room • 718 Huntington Ave, Room 204

Damian Tago

Ph.D. Candidate, Toulouse School of Economics

'Behavioral Responses To Control Strategies for Infectious Diseases – lessons from animal to human health'

How are predicted outcomes of epidemiological models modified when the strategic behavior of agents is incorporated? Methods to account for behavioral responses in epidemiological models will be reviewed, highlighting the similarities and differences between the animal and human health frameworks. Additionally, a new method will be proposed to analyze the spread of an animal infectious disease when farmers behave strategically.
